

SPOTTING CHEMISTRY

General Information/Technical Data Sheet

AlbaChem® Vinyl Liftoff

AlbaChem Vinyl Liftoff completely removes vinyl letters and residues from most fabrics. The Yorker spout allows for easy application minimizing waste. Highly effective and fast drying. Vinyl Liftoff is the home crafter's best friend because it cleans up their mistakes on the spot!

Advantages:

- Most powerful residue remover
- Great for removing tagless
- Fast Drying
- Leaves no stains
- Does not contain any chlorinated solvents

Packaging:

Item No.	Package Size	Case Pack	Case Weight	Hazmat Information
1025	6 fl. oz. (177 ml)	12	7 lbs.	Flammable Liquid, n.o.s/ *Limited Quantity Exemption

Limited Quantity Exemption: This product, as packaged in the 8 Oz containers, meets the exemption requirements of section 173.150 (49 CFR173) as a limited quantity for ground shipment within the United States. Limited quantities require the limited quantity diamond mark on all outer cartons

Directions for use:

Use only in a well ventilated area. Shake well. Turn the garment inside-out and apply the solvent to the underside of the heat applied material. This will release the vinyl from the substrate. Once you have applied the solvent, it is best to stretch or pull the area of the mistake. This will make the heat applied material start to peel off of the garment. Pull off the remaining letter. Remove any residue left on the front side of the garment by applying AlbaChem Vinyl Liftoff to a clean white rag and rubbing off the residue. Repeat process if necessary.

Technical Data:

Physical Properties

Appearance: Clear Colorless liquid

Solubility in Water: Yes

Odor: Solvent

Chemical Family: Acetal/Ester Blend

Environmental:

Volatile Organic Compound (VOC): <20%

Hazardous Air Pollutant (HAP): No

Ozone Depleting Substance: No

Consult safety data sheet for all safety and handling information.
