

# ADHESIVES

## General Information/Technical Data Sheet

### AlbaChem® Brush Tack Water Based Pallet Adhesive

AlbaChem® Brush Tack is a non-flammable, non-V.O.C. water-based adhesive. It is specifically designed for manual application. It is more viscous with a higher solid content than most providing a long lasting pressure sensitive tack for your screen printing pallets. Using Brush-Tack will keep your press, floors and personnel clean. Brush-Tack can be brushed or carded on the pallets.

#### Packaging:

Item No.	Package Size	Case Pack	Case Weight
1099	16oz (.47 liters) w/spreader	12	16 lbs
1095	1 -Quart (.94 liters)	12	32 lbs.
1096	1-Gallon (3.8 liters)	4	36 lbs.
1097	5-Gallon (19 liters)	1 Pail	45 lbs.
1098	55-Gallon (209 ltrs)	1 Drum	500 lbs.

#### Advantages:

- Long lasting tack
- 60% reduction in adhesive costs compared to aerosol cans
- Flash-able
- Does not contain any acetone or other ketones.
- No flashpoint detected.

#### Directions for use:

Apply thin layer of Brush-Tack with brush, roller or card. Allow to air dry or flash pallet to obtain immediate tack. Print, apply more as needed. Clean-up with warm soapy water or mild solvent.

**Tips:** Use pallet protector, water-based adhesives do not clean-up as easy as solvent based aerosols. Before applying more product. spray pallet with water to re-activate tack

#### Physical Properties:

Appearance: White  
Solubility in Water: Complete  
Odor: Mild-Characteristic  
Chemical Family: Waterborne synthetic resin

#### Environmental:

Volatile Organic Compound (VOC): No Hazardous Air Pollutant (HAP): No  
Ozone Depleting Substance: No  
SARA 313 Chemicals: No

#### HMIS HAZARD RATING:

Health: 1 (Slight)  
Flammability: 0 (Insignificant)  
Physical Hazard: 0 (Slight)  
Personal Protection: A (Safety Goggles)

#### Transportation:

Shipping Restrictions: Not Hazardous  
Not Regulated
