- 3000 PSI of Power
- New Japanese-Made Adjustable Nozzle
- Air Vented Housing to Keep Gun Cool
- Powerful Pinpoint Stream
- Brass Pump Cylinder
- Adjustable Flow Rate
- Large Capacity Canister
- Operates on electricity and compressed air (for air dryer)

Directions for Use:

Use QD-3500 with a vacuum exhaust system to remove solvent vapors. Place stain fabric on cleaning buck (arm or spot cleaning station). Turn the adjustable nozzle to a position that is strong enough to shoot out the stain yet not so concentrated as to damage the fabric. Hold gun 6-10 inches from the fabric, starting from the outside of the stain working inwards shoot out the stain. Immediately afterwards "feather" the stain by turning the nozzle to a fine mist setting and spray around the area of the removed stain. This will reduce the "rings" that can sometimes form on some fabrics. Use compressed air trigger to dry fabric from the outside working inwards or allow fabric to air dry or speed dry with vacuum system.

Shipping Specifications:

Case Pack: 10 units

Case Dimensions: 32" X 10" X 21"

Case Weight: 36 lbs

Individual Units:

Box Dimensions: 10" X 8" X 8"

Box Weight: 4 lbs
